

Reflections

Patio Door

Featuring
Decorum®
BY SIMONTON

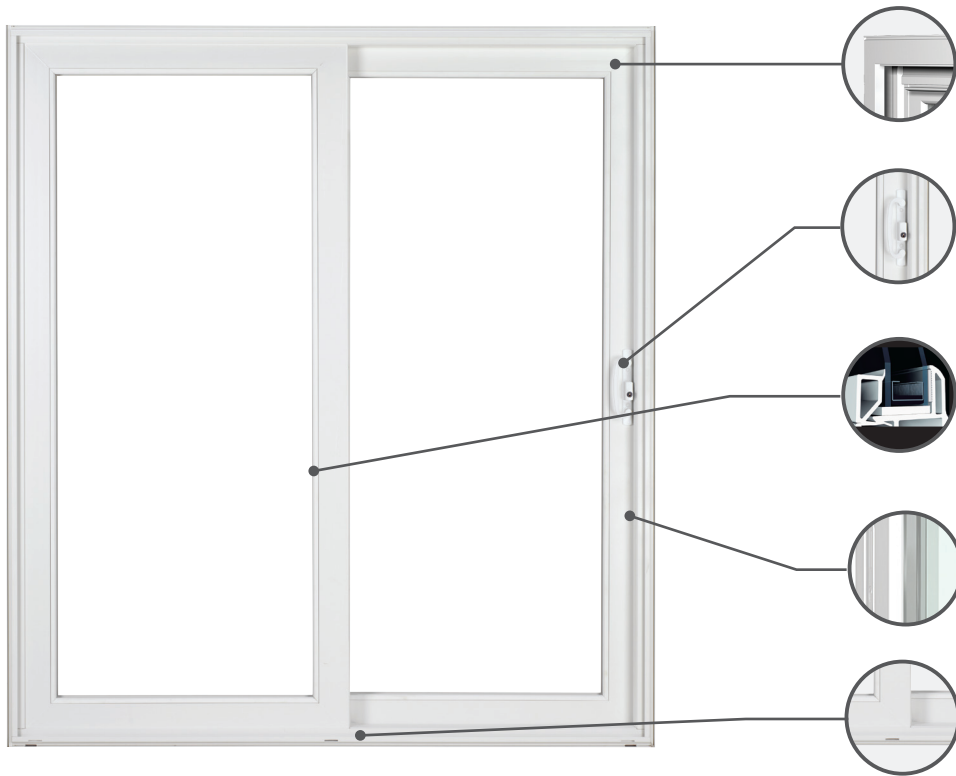

A patio door that will match your style and exceed your expectations

Every Simonton Reflections® 5500 Patio Door is designed to coordinate perfectly with our windows and engineered to remain structurally sound and energy efficient for years to come.

Myth – It doesn't matter what type of patio door I choose because they all work the same way.

Even though most patio doors may operate the same way, the real difference is in the details. Every Reflections 5500 Patio Door is manufactured with multiple features that provide energy efficiency, a greater sense of security and quality you can count on.

Fusion-welded construction bonds each corner together to create rigid, one-piece panels that offer reliable strength and durability

A **multi-point locking system, double-strength tempered glass, external keyed lock and optional foot bolt** provide added security

The **Intercept® spacer system's unique U-shaped design** keeps glass warmer for increased efficiency and comfort, while flexing and contracting to reduce seal failure

Fin seal weatherstripping along the frame and an **attached interlock** help reduce air and water infiltration

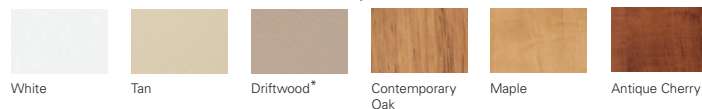

Adjustable corrosion-resistant* rollers and a stainless steel cap allow for smooth panel operation over time

Style Options **Decorum** BY SIMONTON

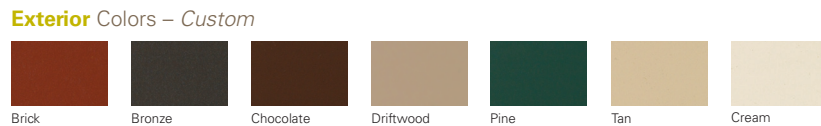

We took care of the essentials. Now the fun part's up to you. Each of our patio doors can be ordered with Decorum®, a portfolio of popular interior and exterior design options that allow you to customize your Patio Door to fit your unique style.

- 1 Choose your interior and exterior color.
